AGENDA FOR AUGUST 10, 2007 TELEPHONE INTERVIEW

Sir:

Applicants appreciate the Examiner's willingness to discuss the pending claims with Applicants' representative D. Scott Moore (Registration No. 42,011) at 1:30 PM on Friday, August 10, 2007.

During the interview, Applicants would like to discuss pages 13 and 14 of the Final Office Action mailed May 17, 2007 (hereinafter "Final Action") in which it is alleged that "the ability to decode satellite television broadcast transmissions can be configured for descrambling broadcasts of local television stations re-broadcast by the broadcast provider 20 through the satellite broadcast system" (Hirsch, paragraph 39) corresponds to the following recitations of independent Claim 1:

...
obtaining authorization from a media broadcaster that provides streaming media to rebroadcast the streaming media over the wireless network;

obtaining a subscription at the wireless network from the at least one mobile terminal for the streaming media;

It appears that the Final Action is alleging that the local television station corresponds to the recited media broadcaster and the satellite system 18 corresponds to the recited

wireless communication network. The first recitation of Claim 1, however, describes the wireless communication network as facilitating communication between at least one mobile terminal and another communication device. The satellite system 18 does not facilitate communication between one or more mobile terminals and another communication device. Moreover, Claim 1 recites that the subscription for the streaming media is obtained at the wireless network. Hirsch, by contrast, uses the wireless carrier network 48, not the satellite system 18, to carry out the authentication/provisioning of the media receiver 28 to allow the media receiver to descramble the local television broadcasts.

Applicants respectfully submit that Hirsch fails to disclose or suggest, at least, the recitations of independent Claims 1, 12, and 23 related to obtaining authorization from a media broadcaster to allow the streaming media to be rebroadcast over the wireless network and obtaining a subscription at the wireless network from the at least one mobile terminal that receives the rebroadcast of the streaming media, which are acknowledged in the Office Action as missing from Curcio.

Respectfully submitted,

D. Scott Moore
